Sanjida Islam

Institute of Science & Technology

Dhanmondi, Dhaka

shoshey.returns@gmail.com

Dear Mrs. Sanjida Islam,

I am writing to apply for the position of Software Developer as informed from you, for which I have enclosed my most up-to-date resume.

I consider myself as a Software Engineer with an array of credentials to support this statement. Complementing my diverse skill set, I have developed an excellent understanding of a wide range of programming languages and tools and have demonstrated this capability throughout my ongoing Computer Science degree from Institute of Science & Technology under National University, Bangladesh, which is due to be completed in March 2019.

While pursuing my education, I have been recognized for my outstanding ability to work as part of a team. It is for this reason I have participated with zeal in multiple team-oriented courses and projects and have consistently delivered finished assignments as per requirements and always within the allotted time provided.

As noted on my resume, I have also been able to utilize my diverse technical knowledge while volunteering in multiple capacities. It is with enthusiasm that I have been able to gain exposure to multiple technologies, platforms, and operating languages through the course of my perpetual quest for knowledge.

I am sure after appraisal of my resume you will see I am an individual with excellent potential in an organization. In addition to the skills listed, I also have an excellent work ethic, personality and tenacious attitude. I look forward to hearing from you in due course.

Sincerely,

Rezaul Karim Shaon
